GTA 5 PC Grand Theft Auto V is a 2013 action-adventure video game developed by Rockstar North and published by Rockstar Games. The game takes place in the fictional state of San Andreas in the year 2012, which follows the story of Michael "Mike" Bauer, the protagonist. While trying to stay alive, Michael must get involved in a war for power over a fictional area of San Andreas named the Los Santos Continuum. After completing the game, players could save their game and start a new game to resume their progress. The game features a free-roaming open world and various nonlinear gameplay scenarios, making it one of the first "sandbox" video games. The player's influence in the game is measured by the in-game "V-score". The V-score affects the morality of Michael's actions, and by extension the actions of other characters, and is used to determine the game's ending. The gameplay involves driving and running, as well as various other types of motor-driven vehicles. It is set in a fictionalized version of the city of San Andreas, where the player can drive or fly their car, motorcycle, or helicopter across the city, accompanied by police chases and other road-related activities. Although the player controls the main character, Michael, the primary focus is on large-scale city-wide events. The game allows the player to perform a variety of activities, such as drive fast cars and chopper, shoot people, and engage in melee combat. GTA 5 – The story is set in the fictional city of San Andreas in the year 2012, in which Michael "Mike" Bauer, a middle-class Los Angeles resident, is kidnapped by a group of international criminals and brought to Los Santos, the fictional country that is situated between the San Andreas and San Tanares. The game opens with Michael as a witness to the killing of his family by a heavily armed gang known as the Ballas, led by the Serbian crime lord Nikolai "Niko" Breckenridge.
